My name is Rakcha Subba , and I decided to change my occupation after two years of working in management. I still like communicating with people and work in a team. I want to alter the accents a bit and switch to web development. As in a management, I learned how to have a good management and persuasiveness. I have been working "on the other side" long enough to realize how important coding and development components are. I have become interested in these fields recently. I am certain that joining your team of with the web development interest would be wonderful . My professional expertise in management can provide valuable insights and a fresh perspective on Management .Personally, I can acquire new knowledge and skills in Coding /web development . I am ready for long-time cooperation.
